Alex said Roni has a plan for Tether. I must have missed it. What is his plan?

No idea. Also, mischaracterization re Shiran/gas fees

Rodney Sunada-Wong

2022-05-13 12:51:11.560 PM

I think Shiran was talking about manual vs automation? but automation of what? i'm having trouble remembering

He mentioned automation of reserves

@Tat Chan @Tamas Antal do you know how much stETH do we have? I think it's trading at a 4-ish% discount. On May 9th we had 194,000 stETH

:01 "we have billions of dollars of liquidity"

Given Recon Live, we have 433,033 stETH/(414,505.5 ETH equivalent)

Has the number of stETH increased from May 9th? I interpret your May 9th Mkt Risk report to say we had 194,000 stETH with a MV of \$448mm

Adjusted Coin Exposure (x1000)	Adjusted Net Exposure (\$MM)	custody Liabilities	Coin
346,083.8	\$564.1	-306.8	CEL
374.56	\$865.1		WETH
194.37	\$448.9		stETH

Shelly Shen

2022-05-13 05:12:30.067 PM

yes, the number of stETH increased since 5/9 freeze

Rodney Sunada-Wong

2022-05-13 05:14:25.523 PM

There are two numbers: sum balance 414k orig balance 433k we are to use "orig balance" and ignore "sum balance"

Shelly Shen

2022-05-13 05:16:05.223 PM

OK, got it

Shelly Shen

2022-05-13 05:16:21.277 PM

btw, asked Justin to confirm the stETH position now

Shelly Shen

2022-05-13 05:28:25.357 PM

Justin said we have very little stETH - see the screen shot below

Shelly Shen

2022-05-13 05:28:28.697 PM

Justin Catuna 12:25 PM

So we sent all of our stETH to borrows on 5/11, we actually have very little if any stETH

Believe the difference could be our unwind from our bETH position on Terra a few days back, will confirm the numbers

Shelly Shen

2022-05-13 05:29:05.907 PM

he is further confirming the difference now

Rodney Sunada-Wong

2022-05-13 05:29:37.623 PM

That's the DeFi team. They feel they returned the stETH to Treasury

0:27 - "Bitcoin is deflationary" = capped supply /= deflationary, thoughts ?

Rodney Sunada-Wong

I estimate $433,000 * \$2,075 * -4\% \text{ discount} = -\36mm

[12:31 PM] We unwind 215,649.95 bETH from RD - ANCHOR - bETH.2 and 9,301 NETH from RD - Anchor - bETH. Both bETH and nETH are essentially stETH on the Terra chain and they were converted back to stETH when moved back to Ethereum. That accounts for all but 14k in the increase [12:32 PM] We don't have any additional bETH or nETH left on the Terra chain

Shelly Shen

2022-05-13 05:34:36.227 PM

above from Justin

I like your alliteration

Shelly Shen

2022-05-13 05:40:51.863 PM

Yes, you are right Rodney. DeFi team thought they unwind all the stETH and sent back to Treasury

 **Justin Catuna** 12:27 PM
Thanks!

We unwind 215,649.95 bETH from RD - ANCHOR - bETH.2 and 9,301 NETH from RD - Anchor - bETH. Both bETH and nETH are essentially stETH on the Terra chain and they were converted back to stETH when moved back to Ethereum. That accounts for all but 14k in the increase

We don't have any additional bETH or nETH left on the Terra chain

 **Shelly Shen** 12:36 PM
I see, so it means we have all the stETH (433k or so) on Ethereum and above statement for very little stETH is for the stETH on Terra, right?

 **Justin Catuna** 12:37 PM
No, we actually sent all stETH from unwinding the Terra positions to either treasury or borrows. We also unwind our YD - Curve - stETH position and sent all of that to borrows as well

0:55 -- Millions of customers, untrue

over a billion dollars worth of withdraws, which is just a you know triple quadruple what a normal week is right? I mean did that fall asleep so and and these are tens of thousands of transactions and we're not talking about like 10 transactions of a hundred million right. That's not what happening at Celsius right? We have millions of customers and when they all knock on the door at the same time. And yes there are delays. It's not just delays our system functioned properly. We might have some slippage or some

ok. i got clarity that • DeFi owns the basis risk of stETH vs ETH • Treasury owns liquidity risk
